

The Crowded Universe: The Search for Living Planets

We are nearing a turning point in our quest for life in the universe—we now have the capacity to detect Earth-like planets around other stars. But will we find any? We are on the verge of determining the frequency of Earth-like planets in the Universe, says Alan Boss, a key scientist on the Kepler space. But will we find any? In *The Crowded Universe*, renowned astronomer Alan Boss argues that based on what we already know about planetary systems, alien life is common and will soon be found.
